

COURSE: Historical Building Adaptation to Modern Function

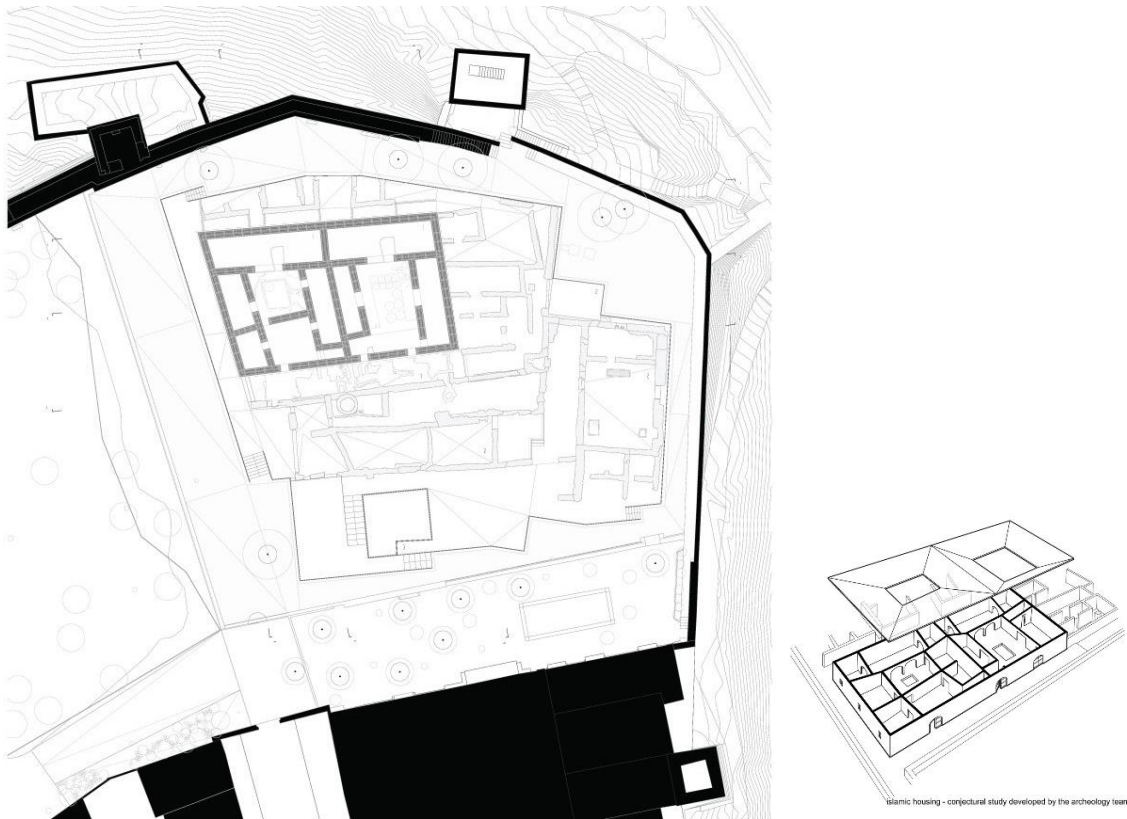

Name:

Date:

School year:

**EXERCISE 2.**

From the following ruins, the archaeological Site of Praça Nova of São Jorge Castle, elaborate a study of its circulations in order to enable them for visiting. This will require some sketches over the possible itineraries, a description of horizontal and vertical elements and a constructive approach to the proposed elements. The drawings could be accompanied by some explanation about the architectural, design and constructive criteria.

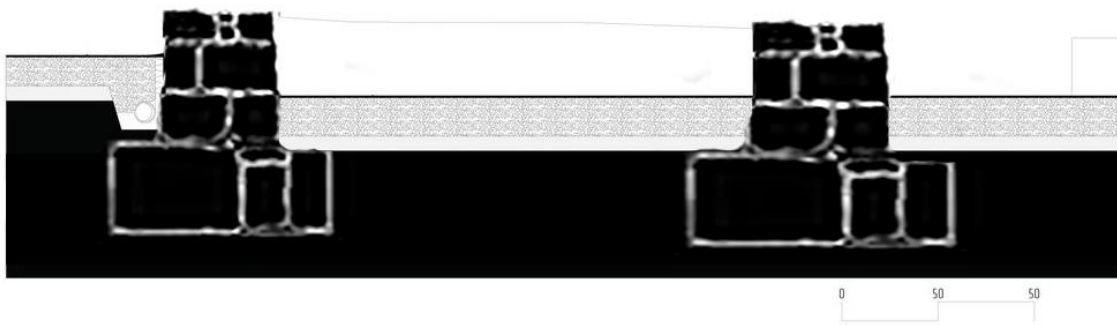

Plan of the archaeological site
